Accelerator

powered by  **Khan Academy**

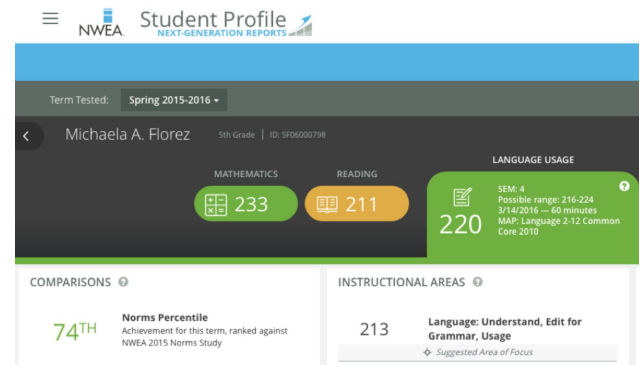

How it Works

The MAP Accelerator helps teachers meet the needs of *all* students through a close connection between interim assessment results and personalized learning pathways.

1

Know where each student stands.

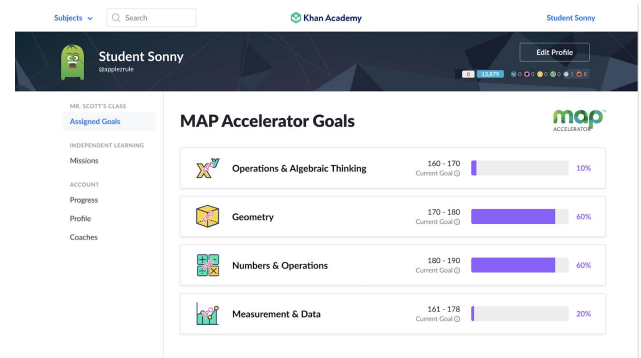

Students take the MAP Growth interim assessment, which provides a clear picture of each student's current level and trajectory across the learning continuum.

2

Get started on learning edge.

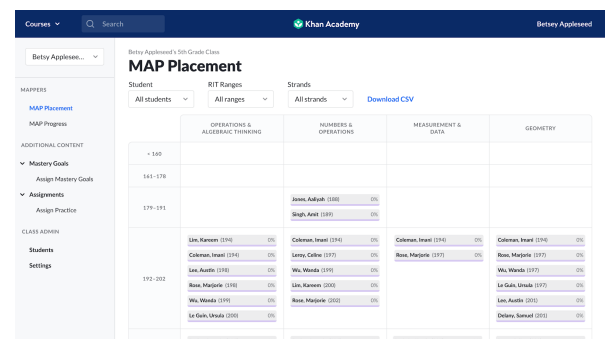

Results of the MAP Growth assessment automatically create custom learning paths for each student within the MAP Accelerator, powered by Khan Academy's mastery learning system.

3

Customized lessons for each student.

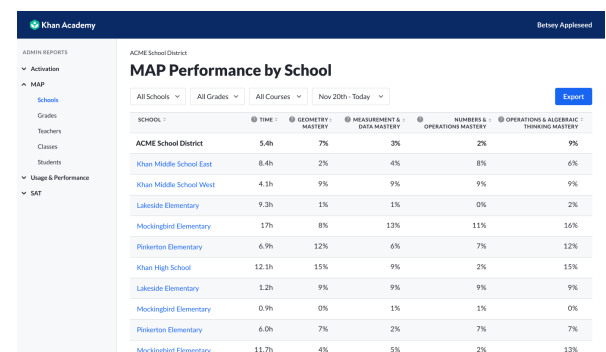

Educators can customize each pathway, track progress, and identify the skills that students need extra support to help their classes fill gaps and accelerate progress.

4

Data and reports to analyze impact.

Educators, administrators and leadership can view progress and analyze the impact of the MAP Accelerator, making sure that the tool works for students and teachers.

MAP Accelerator Content

Mathematics

Grades 3-8

The MAP Accelerator will be available for students in Grades 3-8 in 2019-2020.

3rd grade math standards

100+ exercises
1000+ practice problems
120+ instructional videos
and articles

4th grade math standards

130+ exercises
1300+ practice problems
210+ instructional videos
and articles

5th grade math standards

100+ exercises
1500+ practice problems
165+ instructional videos
and articles

6th grade math standards

150+ exercises
1500+ practice problems
230+ instructional videos
and articles

7th grade math standards

100+ exercises
1000+ practice problems
160+ instructional videos
and articles

8th grade math standards

120+ exercises
1200+ practice problems
240+ instructional videos
and articles

Technical Compatibility

The MAP Accelerator is fully supported on the latest editions of Google Chrome, Firefox, Safari, and Edge.

The online personalized learning tool works on most popular devices, including iPads® and Chromebooks®. The learning platform is stable and reliable, hosting 18 million+ active learners each month.

Security and Privacy Information

Khan Academy and NWEA are both committed to creating safe and secure online environments for all users. We do not sell personal information to third parties. We established ourselves as nonprofit organizations so that we would not jeopardize our mission and the trust of our users through for-profit motives.

The MAP Accelerator is designed to help schools protect personal information from students' records as required by FERPA, and we agree to uphold our responsibilities under the Children's Online Privacy and Protection Act (COPPA). We also take extra precautions for students under the age of 13.

Read our full privacy policy at www.khanacademy.org/about/privacy-policy.
